

The Zynq Book

Information Sheet

Please take this information sheet along to your local bookshop or library. This sheet contains all of the information required to identify the book.

Title: **The Zynq Book**
Subtitle: **Embedded Processing with the
ARM Cortex-A9 on the Xilinx
Zynq-7000 All Programmable SoC**

Authors: **Louise H. Crockett**
Ross A. Elliot
Martin A. Enderwitz
Robert W. Stewart

Publisher: **Strathclyde Academic Media**

Date published: **July 2014**

ISBN-10: **099297870X**

ISBN-13: **978-0-9929787-0-9**

Description:

This book is about the Zynq-7000 All Programmable System on Chip, the family of devices from Xilinx that combines an application-grade ARM Cortex-A9 processor with traditional FPGA logic fabric. Catering for both new and experienced readers, it covers fundamental issues in an accessible way, starting with a clear overview of the device architecture, and an introduction to the design tools and processes for developing a Zynq SoC. Later chapters progress to more advanced topics such as embedded systems development, IP block design and operating systems. Maintaining a 'real-world' perspective, the book also compares Zynq with other device alternatives, and considers end-user applications. The Zynq Book is accompanied by a set of practical tutorials hosted on a companion website. These tutorials will guide the reader through first steps with Zynq, following on to a complete, audio-based embedded systems design.
